

Facing Changes In Employment

By Rosemary Augustine

Published in 1995, Facing Changes In Employment continues to apply today to an ever changing workforce. A guide to creating employment for today's workforce, Facing Changes takes into consideration a variety of employment options that are still popular today.

Topics include:

The Employment Future - remember this was written in the 1990s, yet the employment future has come to fruition.

Facing Transition – negative self talk, lack of confidence and fear hinder any job search or new career path.

Creating Career Focus – staying focused is vital to success – whether employed by a big corporation or self-employed in your own business.

Networking Techniques – still the #1 way to find a job in any market, any situation, any career path.

Facing Age Discrimination – prevalent in the 1990s... even more so in the 21st Century.

Facing Changes In Employment is available in soft cover copy or eBook. Consider still, a guide for creating employment for today's workforce.
